IWAKI

EWN-Y
series

Electromagnetic metering pumps

Electromagnetic metering pumps with precise flow monitoring, feedback & control

Conventional electromagnetic metering pumps generally suffer from low resistance to exposure of external liquids. With improved sealing of not only the control unit but also the pump unit, a remarkable improvement to this exposure has been achieved in the EWN series.

Electromagnetic metering pumps with precise flow monitoring, feedback & control

The EWN-Y electromagnetic pump combined with EFS flow sensor (option) provides accurate real time control & display of dosing rate.

The required flow rate is simply input to the pump. Through feedback from the EFS sensor, the pump constantly adjusts its speed to maintain the set dosing rate - even under changing temperature, viscosity, or suction & discharge pressure conditions.

The EFS is mounted directly on the pump to digitally display dosing rate per minute or hour - ALL WITHOUT ANY CALIBRATION.

The EWN-Y gives a proportional 4-20mA output signal of dosing rate and displays operating history such as total flow volume and power-on time.

EWN-Y
With EFS flow sensor (option)

Displaying flow rate

Pump flow rate may be displayed. In case the EFS flow sensor (option) is installed, the EWN-Y pump can display accurate real time flow rate without any calibration.

Feedback control (with EFS)

Flow rate monitoring of individual strokes by the EFS sensor enable fast response feed back control. The feedback control maintains the set capacity by manually or externally with analog input signal.

Discharge detection

Direct connection to the IWAKI FCP or FCM flow counter (excluding certain low- pressure models) allows effective monitoring of pump discharge (number of shots). Gas lock, abnormal pressure (only with FCP), etc., are also detectable.

Alarm output and analog output functions are provided as standard function

Two types of alarm outputs and analog output are provided as standard functions. The analog output can be used for flow rate monitoring.

Waterproof structure (IP65)

With the aim of improving resistance to exposure to liquid, the controller unit is installed on the back of the pump and the control panel is protected with a cover as standard equipment.
A rubber gasket is provided between the pump head and the bracket to prevent water from entering from the periphery of the pump head.

Multi hose connection

The use of a new hose stopper eliminates a twist in tube connection.

Max. pressure	MPa	(1.4)	(0.8)	(0.5)	-	(1.2)	(0.8)	-	-	-
Stroke rate	% (spm)	0.1 to 100 (1 to 360)								
Stroke length range	% (mm)	50 to 100 (0.5 to 1.0)				40 to 100 (0.5 to 1.25)				
Current	A	0.8				1.2				
Average power consumption	W	20				24				

- Each discharge capacity shown above is at discharge pressure (stroke length 100%, stroke rate 100%) and increases as a discharge pressure reduces.
- The performance is based on pumping clean water at ambient temperature at rated voltage.
- Liquid temperature ·VC/VH types: -10 to 40ºC ·PC/PH/FC/SH/TC types: -10 to 60ºC
- Max pressure is not guaranteed under any discharge condition. Max pressure of PVC type is 1.2MPa. Please contact us for details.

		STOP	A 2-color LED lights in red when receiving the STOP signal and in orange when receiving the PreSTOP signal.			
		OUT	A LED lights in red when the pump is transmitting a signal to external devices.			
Keypad	5keys		START/STOP, EXT, ▲(UP), ▼(DOWN), Disp			
Control function	STOP/Pre-STOP		Pump keeps running when Pre-STOP is activated.Pump stops when STOP is activated.			
	Prime		Pump runs at max. stroke rate while up and down keys are pushed.			
	Key lock		Key can be locked and unlocked.			
	Inter lock		Operation stop at contact input*1			
	Reading calibration		Reading adjustment of flow volume per shot			
	Buffer		ON/OFF of the batch control buffer memory			
Input	Pulse signal input for batch control		No voltage contact or open collector*2			
	Analogue		0-20mADC (Input resistance is 220Ω.)			
	STOP/Pre-STOP (Level sensor)		No voltage contact or open collector*2			
	AUX		No voltage contact or open collector*2			
	Interlock		No voltage contact or open collector*2			
	Batch		No voltage contact or open collector*2			
Output	OUT1		No voltage contact (Mechanical relay), 250VAC 3A (Resistive load) Either the Signal recognition output*3, Control error, or Poor flow detection is selectable (default: STOP).			
	OUT2		No voltage contact (PhotoMOS relay), AC/DC24V 0.1A Either the Sensor signal output, Synchronous output, Signal recognition output*3, Control error or Poor flow detection is selectable.			
	Analogue		4-20mA DC (Allowable load resistance : 500Ω)			
Data logging			Total flow volume Total number of strokes (1=1000 shots) Total number of signal outputs (OUT1) Total number of signal outputs (OUT2) Total power connection time Total operating time			
Buffer memory			Nonvolatile memory			
Power voltage*4			100-240VAC 50/60Hz			

Note 1: The setting can be changed to "operation resumption at contact input".
Note 2: The maximum applied voltage from the pump to an external contact is 12V at 2.3mA. When using a mechanical relay, its minimum application load should be 1mA or below.
Note 3: STOP/ Pre-STOP/ Interlock/ Batch completion outputs are separately enabled.
Note 4: Observe the specified power voltage range. Otherwise failure may result. The allowable power voltage range is 90-264VAC

Optional accessories

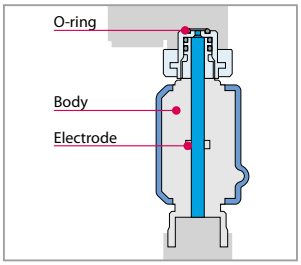
Sensors

• EFS flow sensor

The EFS flow sensor is an electromagnetic flow sensor for the electromagnetic metering pump, EWN-Y series. The flow sensor can measure the volume per stroke of pulsating output without the assistance of pulsation dampers.

· Constructions and materials

	FT	FH
O ring	FKM	EPDM
Body	PVDF	
Electrode	Titanium	Hastelloy C22 or equivalent



· Specifications

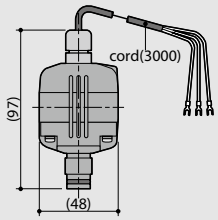
Operating pressure range	0.30 to 1.0 MPa
Indicators	Stop / Error : LED disappears Pressure error : LED lights redly Normal operation : LED lights greenly
Liquid temp.	0 to 40 °C

· Identification

FCP - 1 PC

- **Series symbol**
- **Wet-end material symbol**

· Dimensions in mm

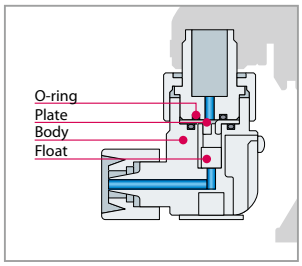


• FCM flow checker

The FCM is a simple flow checker for the electromagnetic metering pump. A magnet molded float sensor and proximity switch detects pulsation of dosing output.

· Constructions and materials

	VC	VH
Body	PVC	
Float	PVC	
Plate	PVC	
O ring	FKM	EPDM



· Specifications

Power voltage	5-24VDC
Max consumption current	8 mA
Max load capacity	15 mA
Output	NPN Open collector
Frequency	Max 6 Hz
Pulse output range	Min flow rate: 0.1 mL/shot Min discharge pressure: 0.2 MPa Max discharge pressure depends on each pump spec. Pump stroke rate: 1-360 spm Pump stroke length: Fixed to 100% (Factory setting)

· Identification

FCM - VC 1

- **Series symbol**
- **Wet-end material symbol**
- **Hose connection code** (Inn.dia. x Out dia)
  - **1**: Ø4 x Ø9
  - **2**: Ø4 x Ø6
  - **7**: Ø1/4" x Ø3/8"

Accessories

• Check valve CAN / CBN / CS

This has the function of a non-return valve and prevents siphon and overfeed.

CAN: Available in PVC and GFRPP.

CBN: In-line type to be connected in the middle of a hose; made of PVC.

CS: Made of stainless steel for SH type.
